STAR OF THE WEEK

The Star Of The Week for this edition of the Newsletter is Marcus Liu of Standard 3. Marcus is an outspoken student and he has been actively participating in various hands-on projects. Marcus has hosted a short show during the SRRK English talent week. He has shown his hidden talent when hosting a talk show. Marcus is confident and well prepared and he is able to attract audience when he is on stage. In class, Marcus is active and shows a great interest in Science experiments.

We wish Marcus continues to be proactive in finding the truth with his great sense of curiosity and excel in his studies.

Marcus Liu (3R)

Dear Parents / Guardians,

It is real fortunate for us to be a part of the school community with a supportive learning culture, a positive learning environment and terrific educators.

With the recent announcement of the third movement control order (MCO 3.0) for Kuala Lumpur and most of Selangor, online classes will be conducted, replacing the physical classes, in order to minimize the risk of COVID-19 infection.

Therefore, there is an urgent need for us to know how to take good care of ourselves during this pandemic. We should:

1. Eat a healthy and balanced diet with sufficient vegetables and fruits.
2. Exercise regularly to control weight and combat health conditions and diseases.
3. Get enough good sleep to lower the risk for serious health problems.
4. Do activities that you really enjoy to improve mood.
5. Connect with others at a deeper level and talk with someone you trust.

On behalf of Rafflesian community, we would like to wish all our Muslim parents, students and staff Selamat Hari Raya, Maaf Zahir dan Batin.

Take care and stay safe. Thank you.

The activity of colouring worksheets has been carried out recently with the aim of enhancing students' understanding of the Mathematics topic of Addition. There were 14 Standard 1 students who were involved in this activity during the revision time. The Mathematics colouring activity has helped students to review and understand better the addition skills while they were having fun doing it.

In conjunction with Mother's Day, a handwritten card or note of thanks is one of the most heartfelt and meaningful ways to express gratitude. Maybe you cannot repay your recipient for the nice things she has done, but you can reflect the thoughtfulness with the time and care you put into writing and sending a warm, gracious thank-you card or note to her.

Students show their appreciation and affection towards their mom's never-ending love!

Hands-On Project :
Develop Circuit
Fan

Ethan

Suggestion for better
commercialization.

the fan spinner need a bigger size
the wire need to be a bit shorter
the battery holder need to be bigger
the board bigger
the switch need some holes
the fan need to be bigger

5R Class students have done a project on making a circuit fan for the RBT subject based on the topic of Application of Engineering Technology Design.

The objectives of the project are to ensure students understand the importance of renewable energy and they can apply the production process of a project correctly.

It is hoped that students can use the tools and materials correctly, and they can evaluate and analyse their projects without any problem.

Aquaponic system is a new project that will soon be integrated into CCA for each level of students. This gardening project will provide students with hands-on experience while implementing their STEM knowledge. Students were curious about how fishes and plants can benefit each other in this process. After the demonstration, students were required to answer questions in worksheets and to design an Aquaponics system individually.

Some aquaponic systems designed by students

Syifa (1R)

Gan Suet Yee (1R)

R'hanya (1R)

Sofea (1R)

Emrys (2R)

Marcus (5R)

Ethan (5R)

Mr. Fareed demonstrating the concept and mechanism of the aquaponics system. Class 5R begins to assembly the aquaponics setup. Hands-on opportunity enable student putting theory into practice.

There will be badminton lessons for the co-curricular activities (CCA) Students will learn the 4 fundamental types of badminton services, that is low serve, high serve, flick serve and drive serve; most can be executed by using forehand or backhand.

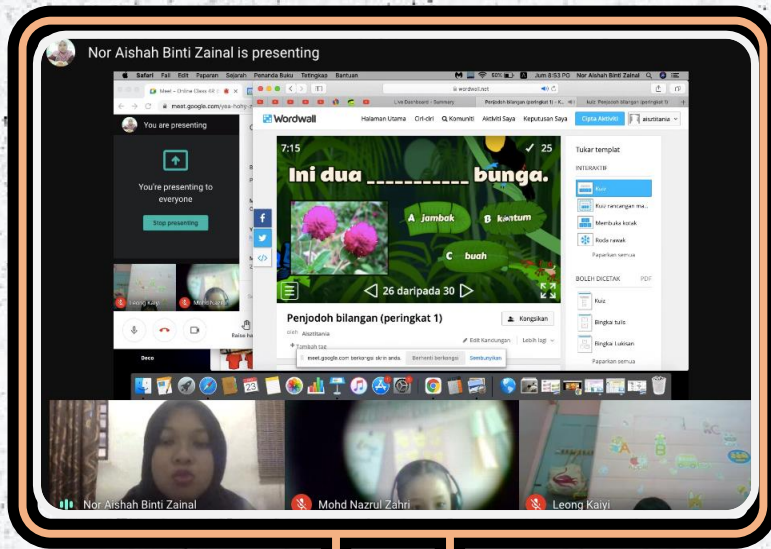

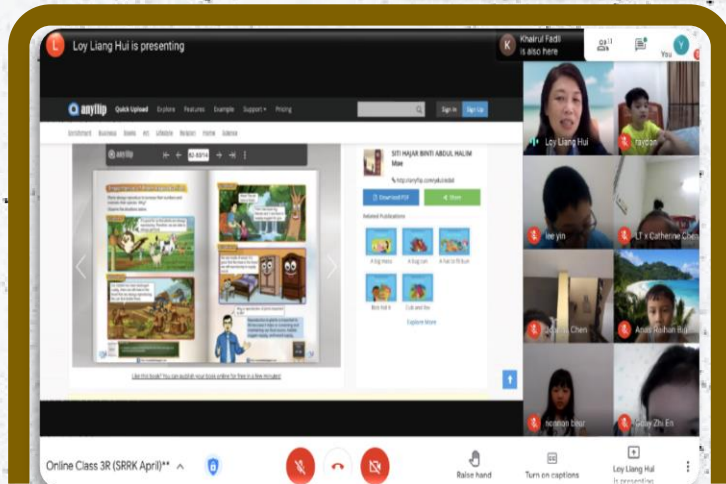

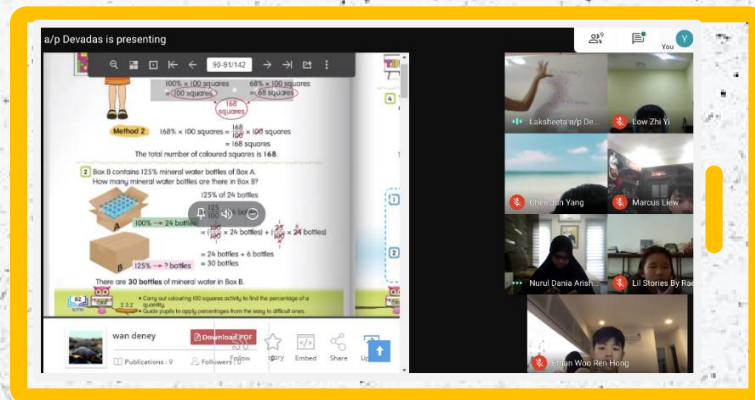

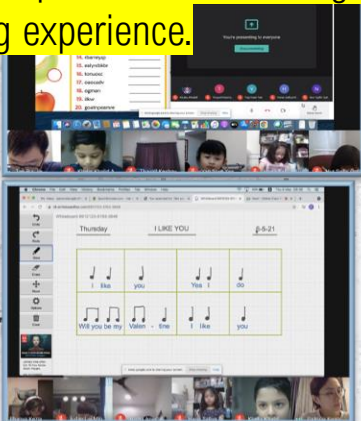

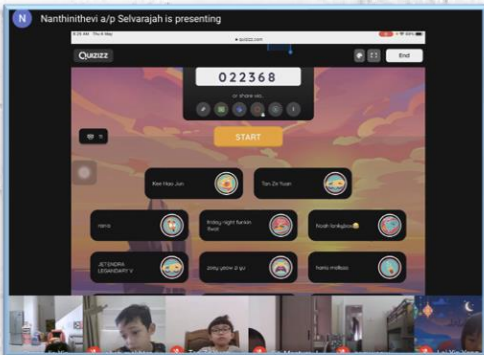

The health benefits of playing badminton include reducing weight, improving lung health and helping to cure hypertension.

In short, physical activities are important to us as it can improve our health and our quality of life. So, let's wait no more and do it right away

The COVID-19 pandemic did not stop us from continuing provide students with best learning experience.

Memastikan anak tidak ke sekolah jika bergejala

As we know, nowadays Covid-19 cases spike rapidly, even in school community. We need to monitor students' social distancing and make sure they always wear masks in the classes.

Mengajar anak lagi mencuci tangan dengan betul

For those who have flu-like symptoms (cough, runny nose & sneezing), please practise right etiquette, that is covering mouth and nose when sneezing or coughing.

Let us practise good personal hygiene and maintain social distancing together.

Take care and stay safe always.

Mendidik anak amalan batuk dan bersin dengan betul

Menasihati anak mengamalkan penjarakan sosial
