STAR OF THE WEEK

The Star of the Week for this edition of the Newsletter is an outstanding individual who impresses everyone he meets. Ethan impressed us with his amazing logical and critical thinking. Whenever he is in the school workshop, he can easily create things out of the materials and tools provided. He also actively participated in sports, including taekwondo and badminton.

Ethan is the most popular student in his class. He demonstrates high ambition and maturity in the classroom. He actively participated in classroom discussions, and he always supported his classmates. His caring nature and personality allow him to work well with others in a team setting.

I am certain that Ethan will continue to do great and creative things in future.

Ethan Woo (5R)

Dear Parents / Guardians,

Kindly be informed that the online lessons have been carried out w.e.f 17th May 2021 due to the spike of the number of Covid-19 cases.

Teachers-in-charge carry out CCA activities as usual, the same as before during physical classes. Other than that, the Music, Physical Education and Art lessons are to be conducted as usual, too.

Nevertheless, we are pleased to inform you that the number of teaching periods for all subjects are still the same as the normal timetable. For your information, we have added one period per week for Character Building Activities (CBA) for all students. This is to guide them to have a proper understanding of their own emotion and behaviour. We will do our level best to provide quality education to all students.

Thank you and stay well always.

Yours sincerely,
Loy Liang Hui
Principal.

1. Mengapakah kita digalakkan untuk minum air kosong?
 Kita digalakkan untuk minum air kosong kerana air ialah komponen utama di dalam badan manusia.

2.) Bagaimanakah faktor usia seseorang mempengaruhi jumlah air yang diminum?
 Faktor usia seseorang mempengaruhi jumlah air yang diminum seperti kanak-kanak dan remaja digalakkan untuk minum enam hingga lapan gelas air sehari.

3.) Mengapakah kita perlu minum air walaupun tidak berasa dahaga?
 Kita perlu minum air walaupun tidak berasa dahaga kerana kita akan berasa lesu dan mengantuk sekiranya kekurangan air.

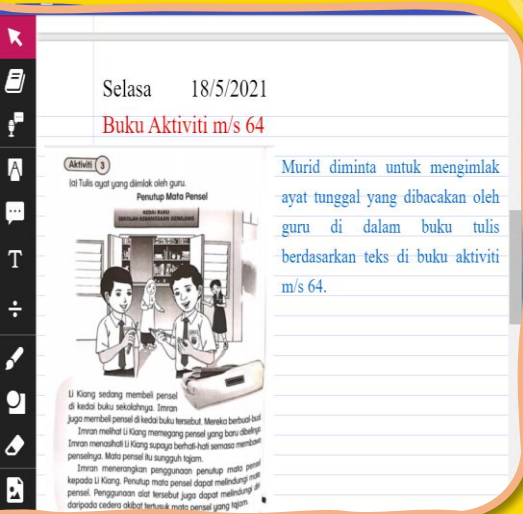

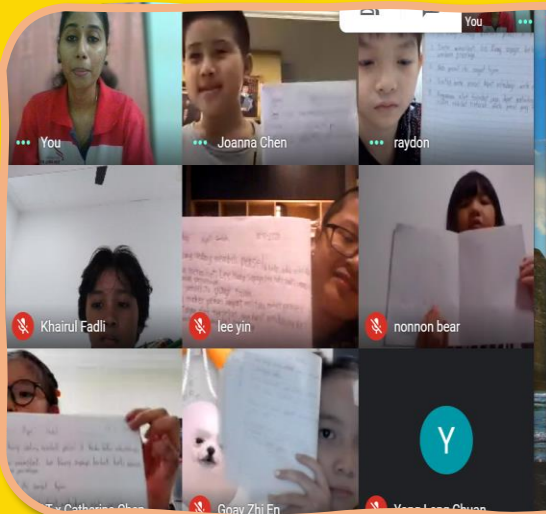

4.) Bagaimanakah cara meningkatkan tumpuan murid ketika berada di dalam kelas?
 Cara meningkatkan tumpuan murid ketika berada di dalam kelas adalah dengan minum air yang secukupnya. Air melancarkan peredaran darah ke otak. Oleh itu, otak menjadi cergas dan murid dapat memberikan tumpuan yang baik semasa guru mengajar.
