## STAR OF THE WEEK

A motivated student, Jetendra progresses steadily in his academics. He actively participates in discussion and loves to share his ideas without any hesitation, as well as following instructions well. Jetendra shows empathy toward others, and he often gives support to fellow students. He never fails to impress his friends with creative ideas and skill. Congratulations on becoming 'The Star of The Week', Jetendra! You deserve it!

Jetendra Vijay Baskar 2R

Dear Parents/ Guardians,

Welcome back to Sekolah Rendah Rafflesia Kajang!

Kindly be informed that the SRRK children were to work out the Compliment Jar during the school holidays. This activity was arranged to guide our children to respect others and speak kind words. Kind words can unlock an iron door. Therefore, all children should learn to speak kind words with grateful heart when they are young.

The online Parent-Teacher Conference was carried out smoothly on 09.07.2021 and 16.07.2021. We appreciate the parents' initiative to make the Parent-Teacher Conference a success as this is a great platform for parents and teachers to share insights and information for the holistic development of children.

I am truly thankful to be associated with amazing parents and children here at Sekolah Rendah Rafflesia Kajang. I am grateful for everyone who has worked hard to support the online lessons.

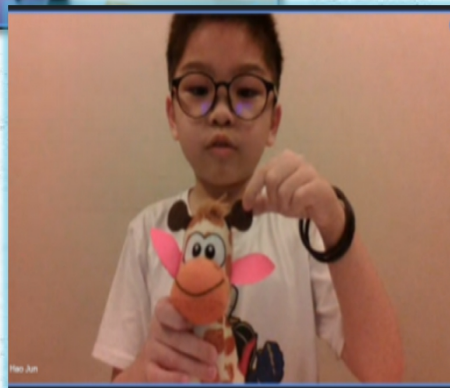

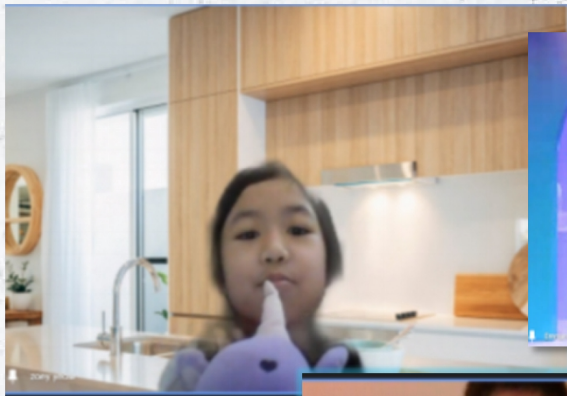

Wishing you and your family the very best. Please take good care and stay well always.

Sincere regards,  
Loy Liang Hui  
Principal

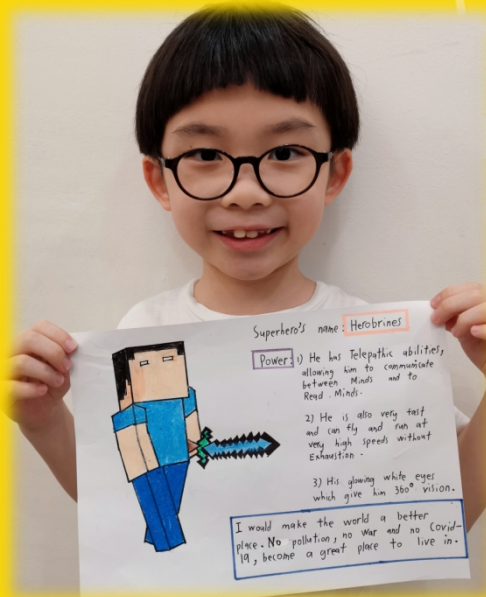

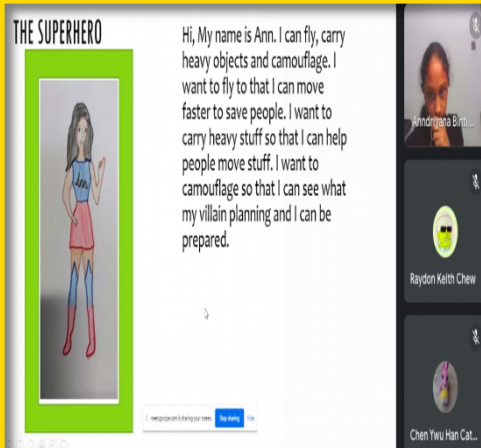

***Students have been assigned the topic of public speaking. They rehearsed, prepared well and presented it with confidence. This session could boost students' presentation skills and enhance their knowledge.***

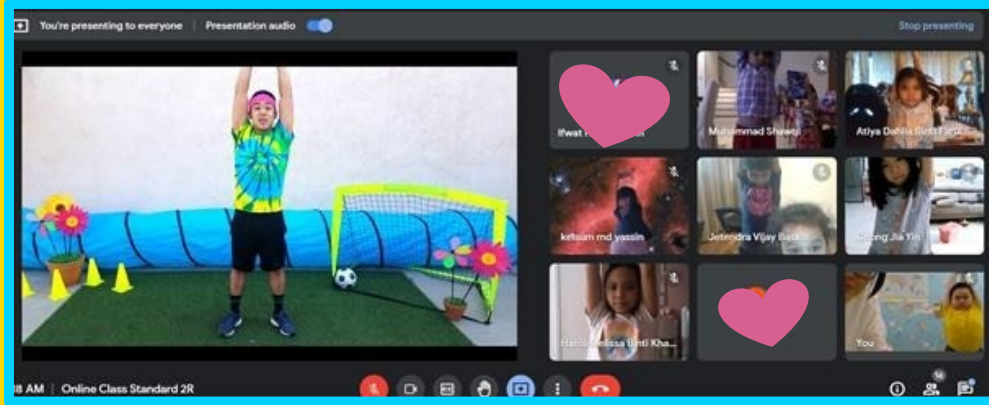

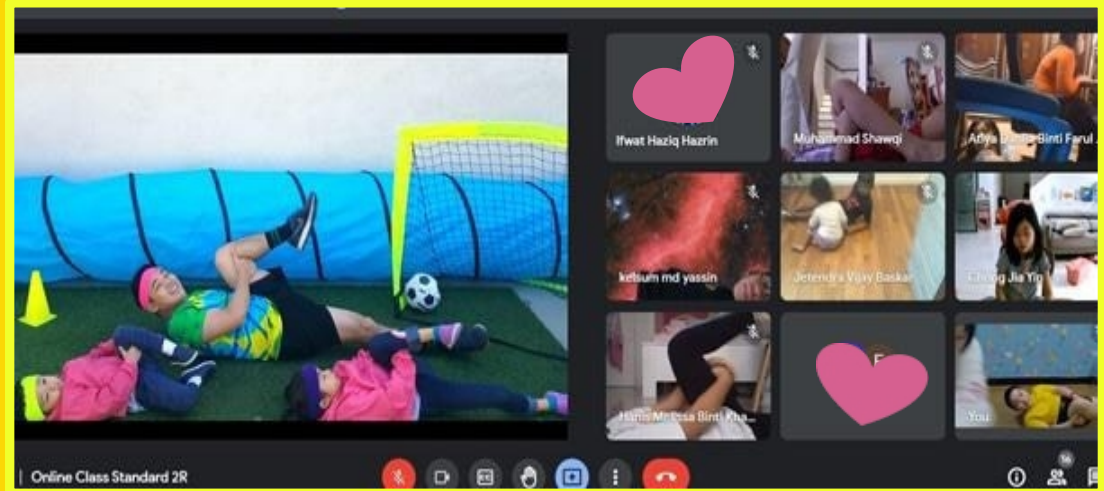

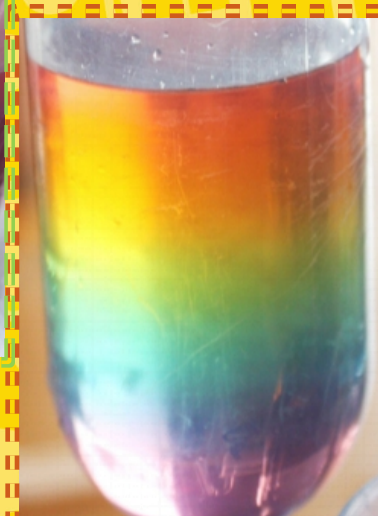

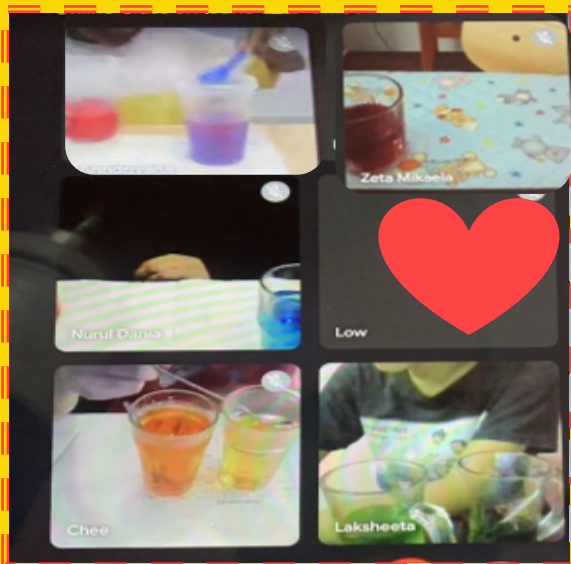

**This activity allowed students to explore their skills in using Google slides and enhance their imagination. They needed to use their creativity to produce a costume that is related to their superpower.**

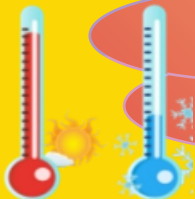

**Children moved their bodies and learnt kickboxing during PE lesson.**

**The Standard 5R students were able to differentiate the temperature of hot and cold water during the Science lesson. They observed the two layers of colour due to different temperatures. This activity helped students to improve their experimental skills.**
