TRADITIONAL VALUES
GLOBAL VISION

Ida Soon, is a diligent and dynamic student. A sweet child, attending school with a little hairband on her hair and was always looking very neat and tidy. Having taught Ida Soon for the past few months, we would like to say that Ida is an active student who partakes in all activities organised by the school. Ida simply loves actions in life. She is a bright, cheerful, outgoing and polite student who is well-loved by teachers and friends. In class, she is like an "Ever-ready" dry cell, always ready to accept, learn and participate during lessons. She often displays seriousness in her work, is reliable and responsible towards all assignments or tasks given to her. We hope Ida Soon will have a bright and promising future and we wish her well. Congratulations! Keep up the good job!

Message from the Principal

TRADITIONAL VALUES **GLOBAL VISION**

Dear Parents/Guardians,

As we stay secured behind closed doors during COVID-19 lockdowns and self quarantine, work from home and online classes have become a norm. What we all need now is patience, optimism, resilience and firm faith in God almighty. While we stay home during this extended COVID-19 lockdown, it's a good time to read books and expand your knowledge. Let's not get paranoid about the Coronavirus pandemic. Just follow the due precautions and take very good care of yourself and those around you. There is a strong ray of hope guiding us to find a way out of the present crisis. We will be out of these stormy waters for sure.

Please be informed that the report card for your child has been made available for viewing on Quickschools. If you have specific questions or concerns please email me at principal.puchong@rafflesia.edu.my

Starting from July 5, 2021 our new online timetable has started. Every subject is covered BUT a reduction in certain subjects to accommodate the extra break has been implemented. Please refer to QS PARENT PORTAL for the online timetable. Do check the latest updates from the teachers. All materials will be uploaded to QS for easy reference.

Thank you for your unwavering and continuous support.

Lava Lamp

Science Experiment

Method

- 1. Fill the bottle 1/3 full of water and add a couple of drops of food colouring to the water.
- 2. Add vegetable oil to the bottle, leaving at least a 5cm gap from the top of the bottle.
- 3. Leave for a few minutes, so that the oil and water separate into 2 layers.
- 4. When you are ready to watch the experiment, remove the cap of the bottle and add half an effervescent table. Leave the cap off the bottle.
- 5. Watch the bubbles of coloured water rise and fall.
- 6. Add the other half of the effervescent tablet to continue the experiment.

You will need:

Plastic bottle

Water

Vegetable oil

Effervescent tablet

Food colouring

Students should be able to answer these questions at the end of experiments:-

What happens to the oil and water after they are left still for a minute?

What happens to the tablet in the oil?

What happens to the tablet in the water?

Why is the water rising up?

Why is it falling back down?

Kemahiran Asas Bola Baling

Berasal daripada kemahiran yang sama dalam permainan bola keranjang. Sesuai untuk hantaran jarak dekat di aras dada. Pergerakan bola itu adalah hasil tolakan dari jari-jari tangan. Tangan hendaklah ikut lajak di akhir tolakan.

HANTARAN LANTUN

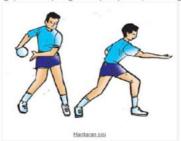

Dilakukan apabila membuat hantaran secara mengejut. Dengan melatunkan bola. Kelemahannya adalah bola itu dapat disekat oleh pihak lawan yang bertindak balas pantas. Hantaran ini biasanya dilakukan dengan sebelah tangan.

Cara ini dilakukan semasa membuat hantaran jauh dan serangan balas secara mengejut (counter-attack). Kelebihan cara ini ialah persediaan hantaran ini boleh mengelirukan pihak lawan. Dari keadaan bersedia, pemain boleh terus mengelecek, menjaring, menukar hala hantaran atau memusingkan badannya.

Cara hantaran sisi juga digunakan bila membuat hantaran jarak dekat dan pantas. Pemain tidak perlu memusingkan badannya untuk menghadap ke arah penerima hantarannya apabila hantaran sisi dilakukan. Hantaran cara ini banyak melibatkan pergerakan pergelangan tangan dan memang sesuai bagi pemain yang mempunyai tapak tangan yang besar.
